

HP Photosmart c4780 New Scanner Glass Replacement

How to replace the scanner glass in case of broken, scratched, or dirty glass. Replacement will help scanning quality.

Written By: garrett hall

TOOLS:

- [iFixit Opening Tools](#) (1)
- [T10 Torx Screwdriver](#) (1)

PARTS:

- [3mm 33.8cm by 24.7cm glass piece](#) (1)

Step 1 — Outer Shell Disassembly

- Lift the top cover of the scanner.
- Using a small plastic prying tool, carefully pry the plastic frame surrounding the glass from the printer hood.
- Pry the side piece from the printer hood.
- Pull the frame out.

Step 2

- Using a T10 screwdriver, unscrew the two screws that fasten the frame to the printer hood.

Step 3

- Pushing the clip behind the cover piece in, pull the cover piece outwards.

Step 4

- There are two screws under where the power button panel was and across the printer slider. Unscrew them with a T10 screwdriver.

Step 5

- Pull the printed circuit board from the main printer body.
- Unplug the small ribbon cable from the circuit board.

Step 6

- Pull the memory card reader's circuit board out of its slot.
- Detach the wire harness.

Step 7

- Press the clip directly behind the TouchSmart panel.
 - Pull the clip to detach.
 - Disconnect the ribbon cable from the TouchSmart panel to detach from the main printer body.
- i** Do not hesitate to use force to remove the TouchSmart panel.

Step 8

- Gripping the printer hood, pull upward.

Step 9 — New Scanner Glass

- With the top half of the printer separated, lift the upper section with the scanner glass away from the lower section of the printer.

Step 10

- With the glass facing upwards, remove the screw holding the glass in place.

Step 11

- Lift the glass up and away from the printer.
- ⓘ Handle glass with care.
- Replace the broken glass piece with the replacement glass

To reassemble your device, follow these instructions in reverse order.
